

## Abandoned Well Declaration

The *Municipal Government Act's* Subdivision and Development Regulations require Developers / Land Owners to identify abandoned oil and gas wells, where present and, to comply with setback requirements. If abandoned wells do exist, subdivision and development applications must show exactly where the wells exist, what the setback distances are (if setbacks are required) and how they have been taken into account. To assist Applicants in collecting the required information, the AER has available an "Abandoned Well Map Viewer" that provides the location, name of the licensee, and status of abandoned wells across Alberta. This can be accessed at: <https://maps.aer.ca/awm/index.html>.

Through use of the viewer, subdivision and development applications must contain the following:

1. A map of the search area from the viewer and a statement that there are no wells in the project area or;
2. A list and map identifying the locations of abandoned wells within the search area, including the surface coordinates, as provided by the viewer or AER Information Services; and
3. A sketch of the proposed development incorporating the necessary setback area for each well.

*If No Wells are listed on site:*
